Product overview

Re-Bo Metal cutting circular saw blades are precision tools "Made in Germany". Highest performance and service life of our products made us famous all around the world.

Re-Bo

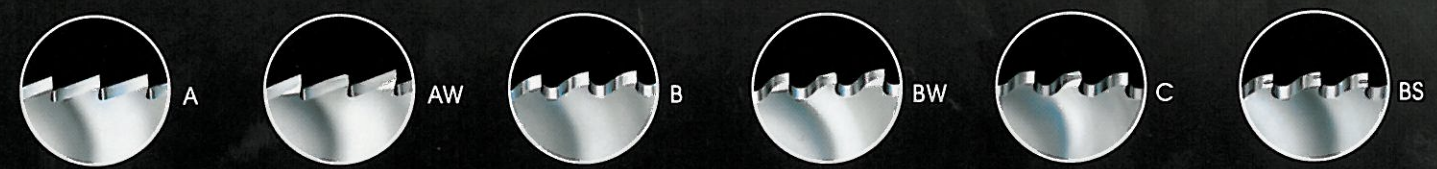

Specialized Manufacturer of
Metal Cutting Circular Saw Blades

We have over 60 years of experience in the manufacturing of metal cutting circular saw blades. Therefore we offer you to be your powerful and competent partner for every challenge you may have for our product application.

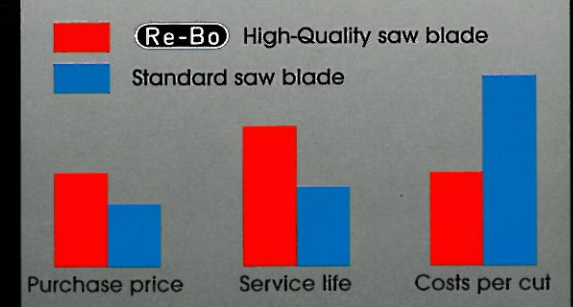

Saw blades are our strength. As you can see from the following product range:

Our Product Range

- **HSS & HSS-E Metal cutting circular saw blades**
 - According to DIN
 - For power-driven machines of all brands worldwide
 - With surface treatment/coatings
 - Custom made (from diameter 10-630 mm)
 - For gang sawing work (used in sets)
- **Solid carbide circular saw blades (VHM)**
 - Similar to DIN
 - Custom made
 - With surface coatings
 - For gang sawing work (used in sets)
- **Tungsten carbide tipped circular saw blades (TCT)**
 - For steel pipes and solid materials
 - For non-ferrous metals
- **Friction circular saw blades**
- **Segmental circular saw blades**
- **Circular knives**
- **Services**

Comparison of economic efficiency

Re-Bo Quality - To Your Advantage!

- Cost Savings achieved through:
- longer service life
 - lower resharpening costs
 - less saw blades needed
 - less machine downtimes
 - better cutting results

Custom made for you

We are able to manufacture every technically possible dimension for you.

Saw Blades made individually for you, could have the following features:

- coatings
- narrowed size tolerances
- special tooth types
- extremely strong hollow grinding
- flat ground
- extremely thin thicknesses
- without toothing
- gang sawing work
- bore, pin holes and key ways in special execution
- imperial sizes
- in-between thicknesses
- high tenacity execution

Re-Bo - Top

The Re-Bo-Top saw blade makes it possible to achieve high cutting speeds and longer service life even with very demanding materials.

Re-Bo - TiN

Metal cutting circular saw blades with TiN-coating for longer service life at higher cutting speeds.

Re-Bo - Spezial

Surface treatment developed by Re-Bo that provides an extremely good protection against materials which tend to stick on the saw blade ("build-up's").

Re-Bo - Extra

Steam treated metal cutting circular saw blades with a black oxide coating for basic steel processing.

We can also offer you all other popular surface coatings.
